Patuxent Research Refuge near Washington, DC

Baltimore Gas & Electric – EPA Workshop

Patuxent Wildlife Refuge

A BGE – Community – Agency Partnership led to cooperative studies with USF&WS, USGS and QDM on 5 miles of ROW to document IVM best practices for invasive weed control and habitat restoration of native plants, birds, mammals and pollinators and serve as educational workshop sites for legislators, agencies, regulators and conservationists, along with existing rural and suburban habitat studies in Maryland.

Invasive plants after cutting

IVM habitat restored

Wire zone prairie – border zone shrubs

Your tax deductible donation will help provide scientific evidence of best vegetation management practices for temperate regions to guide policy and regulatory decisions for electric and natural gas ROW and parkland. Visit www.ivmpartners.org to donate and follow our results and call **302-738-9079** to schedule partnership studies in ecosystems of your region.

IVM Partners is a 501-C-3 non-profit corporation operated exclusively for charitable, scientific, literary, and educational purposes to develop, educate professionals and the public with respect to, and apply best vegetation management and conservation practices and related activities.
