Description: Join our partners at Environment for the Americas to learn ways to connect people to birds and their conservation through this year's International Migratory Bird Day (IMBD) special 20th year celebrations. The 2012 annual bird conservation theme will focus on 20 ways people may help birds every day. Whether you are hosting an event or participating in an event hosted by someone else, we'll help you discover how the 20 ways of helping birds can be incorporated into your IMBD celebration. We'll also share details about the International Migratory Bird Day Challenge – for which you can earn recognition and free outreach materials - and how to get free publicity for your events!!

Created in 1993, International Migratory Bird Day celebrations are now hosted at over 500 sites in three languages (English, Spanish, & French) throughout the Western Hemisphere, reaching hundreds of thousands of youth and adults. These sites include National Forests and Grasslands, Wildlife Refuges, National Parks, museums, nature centers, libraries, and bird observatories.

International Migratory Bird Day is a great way for you to connect to people and help them connect to and protect birds!

Please join us for this fun & informational presentation!
