Agricultural Habitat Restoration: Connecting the Farm and Vineyard to the Ecosystem

Klickitat Canyon Winery and Meadowlark Vineyard

Lyle-Snowden Road, Lyle, Klickitat County
klickitatcanyonwinery.com

Monday, April 22, 2013
Farm Walk 12:30 – 4:00 pm

Sign in 12:00 – 12:30 pm

Informal networking bag lunch begins at 11:45 am

Space Limited to 30 people!

Pre-registration encouraged

Lupine in bloom among the grapes

Robin Dobson and Kathleen Perillo practice eco-dynamic farming in their 5-acre vineyard. They employ no-tilling and introduce abundant native flora into the farm and among crop plants so that biodiversity is naturally restored and out-competes harmful pests. Connecting both the natural and agricultural ecosystems promotes vitality, biodiversity, and greater ecological integrity.

Join the Robin, Kathleen, and Eric Mader from the [Xerces Society for Invertebrate Conservation](#) to explore cultivation and stewardship of the vineyard, which encourages healthy habitat and reduces pests. Learn how they manage the habitat, the harvest, and make wine by hand. Includes a tour of their winery where they use no external inputs and let nature do its work. Wine tasting included.

Cost: \$15 for Tilth Producer members, students and interns.
\$25 for non-members.
\$5 additional late fee for day-of registration.

Space limited - Register Today!

Paid, pre-registration is recommended for all farm walks

Register: www.tilthproducers.org
(206) 632-7506
