

 presents:

Urban Bees

Parallels from France to Guelph

7-9pm Thursday, Oct 24, 2013

Dublin Street United Church

68 Suffolk Street West, Guelph

FREE (donations accepted)

Learn about bees in urban and suburban areas, including their preferred nesting sites, flower choices, and how they are affected by increasing urbanization.

The updated results of a project in Europe will be presented by internationally renowned researcher Bernard Vassiere, with implications for Guelph's own bee community. Discussions will also focus on the types of materials best for bee condos, and how to best attract pollinators to your property.
