

Monarch Vegetation Service, Inc.

Rooted in Success

Rooted in Success

Monarch Vegetation Service (MVS)

bringing pollinator friendly
vegetation to solar arrays
near you.

YES, We Do That!

First year growth, only more flowers to come.

***Drill Seeder Achieves Great
Seed to Soil Contact &
Limited Soil Disturbance***

Bring It On Rain, We Are Ready!

Straw Mulch

Erosion Control Blanket

You need vegetation,
so let MVS install beneficial
vegetation. Let us help you
achieve soil stabilization,
improve soil quality,
provide critical habitat for
species all while reducing
long-term operation &
maintenance cost.

Monarch Vegetation Service, Inc.

Rooted in Success

Blooming Solar Field

*Drill Seeding Between Erected Panels,
YES, We Do That!*

MVS works with seed availability, soil condition and erosion concerns when designing and providing a site-specific seed mix.

MVS has the knowledge and equipment for your seed or planting installation. MVS wants to be the seed and plant installer on your site.

(Again **YES, We Do That!**) We bring 45 years' experience

and techniques to your project site. The goal of MVS is to provide your project with competitive pricing and not try to look for change orders.
